

Product Sheet: HTML Assistant Pro 2000

HTML Assistant Pro 2000 is a tag editor that makes Web page creation easy and fun without hiding the HTML code from you. With **HTML Assistant Pro 2000** you can very quickly create your Web site and easily edit your Web pages from there on in.

HTML Assistant ensures that you'll have all the tools necessary for developing even the most complex of Web sites. Features include:

- Table, Form, Background, and Image Map Assistants guide you through the process of designing complex Web elements.
- When it comes to implementing frames, there are few tools currently available that are more powerful and intuitive to use than HTML Assistant's QuickFrames.
- Edit your work without leaving the editor, so you can quickly see how your page will look on the Web.
- HTML Assistant Pro is the beautiful "middle ground" that allows users to write HTML and gives you the control that you want and need over the page.
- **And you'll automatically learn HTML at the same time!**

Product Feature

Feature Matrix:

Feature:	Benefit:
Support for multimedia tags, such as JavaScript , and DHTML .	Create cutting-edge work with HTML Assistant Pro.
Add new HTML tags with the customizable User Tool Bar .	Your editor and your work will always be up to date.
Built in Site Assistant and Quick Publish features	You can up-load your pages instantly as you make changes to your site. Pro 2000 will automatically find and place your new page in the proper location at your server.
Easy to use Main Tool Bar -- the tools you use most often are clearly marked and readily accessible.	This makes HTML page creation quick and easy, even for beginners.
With Pro 2000's Quick View feature you can preview your work instantly.	See how your page looks in Internet Explorer at the touch of button

Import word processor files, including formatting and tables, with RTF to HTML conversion .	No need to retype your existing documents. Bring them into HTML Assistant Pro as RTF files and they will automatically be converted to HTML. This feature also makes it easy to copy tables from your favorite spreadsheet and paste them into your Web pages.
Frames are easy with HTML Assistant Pro's Quick Frames .	Pro provides a list of commonly used frame layouts as part of its frame dialog. This quickly gets a user past the arduous task of defining layouts.
Multiple File Replace	Modify multiple documents simultaneously, and save yourself hours of labor.
Speed up your work with Colored Tags, Spell Checker , and virtually unlimited Undo and Redo .	Edit your code effortlessly, eliminate typos, experiment and make changes without fear of losing your work.
Tag text, paste URLs, position and format graphics, and create backgrounds, tables, forms, frames, and image maps, all quickly and precisely.	Write and tweak your HTML to perfection. You have full control of the code in HTML Assistant Pro.

About Brooklyn North Software Works

President, Howard Harowitz, released HTML Assistant Pro in early 1994 making it the first Web page editor on the market. When it appeared, the computer industry press published articles and reviews of this new product. Awards and accolades followed, and our first software package consistently came out on top -- even when other products, from much larger companies, hit the market. HTML Assistant Pro 2000 is the sixth generation of our original software. It is still among the top Web page editors worldwide.

As one of the earliest developers of Web technology we used the Internet and the World Wide Web as our primary vehicle to market and distribute our products. Operating from our home office in Bedford, Nova Scotia, Canada we were able to generate sales revenue of over a million dollars within the first eighteen months of operation.
